The Special Interest Areas Conservation Action Plan will address all areas on Fort Wainwright that contain unique, rare, unusual, atypical, sensitive, or otherwise special natural resources or environmental conditions that warrant protective or special management practices. Since these areas may vary considerably in their unique or special features, they will be treated individually within the plan. It will include detailed descriptions of each area along with individual management prescriptions. In some cases, management actions may require stringent protection restrictions and constraints. This plan will be sensitive to and considerate of the military training mission by using a very conservative approach regarding restrictions and prohibitions. It will be fully coordinated with the ITAM program.
